**As soon as you click on either the training material name or on “View training material” – your fourteen day access period begins for that product.** During this access time period, you may view the training module as many times as you like. You may go directly to any portion of the module without having to repeat portions of the module that you don’t want to view/review a second time. At the end of your time allotment, you will no longer be able to access or review the training module.

- ❖ **Note:** If you have purchased a Package of Modules **specific to your Department**, you will have access to your modules for an extended period of time. In these cases, your usage period **will be as detailed on the product page and the fourteen day usage period will not apply to your purchase.** Your access period, as stipulated on the agency-specific product page, will begin the first time that you access/view any training module or material included in the package.

- You may pause a module at any time. If you are not able to view the entire module, you may log back into your account when you're ready to continue and open the module. The player will give you the option to resume where you left off.
  - **If you have purchased multiple individual modules**, your fourteen day time allotment for each module will not begin until you first access the product. As soon as you click on either the training material name or on "View training material" – your fourteen day access period will begin for that individual module. (Again, as noted above, this does not apply to the purchases of the Package of Modules that are listed as specific to your department/agency.)
3. When you click on either the product name or on "View training material," you will see everything included with your purchase of that module, including the supporting documents and practice exercises. The training modules are listed under "Document Type" as Presenter Documents. Practice materials and supporting documents are listed under "Document Type" as PDF Documents.
- If you have purchased one of our Structured Oral Interview or any Assessment Center Exercise modules, we have included access to our "Introduction to Assessment Centers, Oral Boards, and Structured Interviews" training module. It covers an overview of the assessment center methodology, what happens behind the scenes of the process, what type of candidate performance is valued by assessors, what the candidate must do to create an overall favorable impression and score well in general terms, and how the candidate may fill the role of the target position for which he/she is competing. This module is **a learning "must,"** and sets the stage for the specific exercise modules to follow. This introductory module should be viewed (and re-viewed as necessary) prior to viewing other modules. If you have purchased one of the Structured Oral Interview or Assessment Center Modules, the "Introduction to Assessment Centers Training Module" will be the first item listed. Please see the illustration on the following page.
